

## SUMMARY

Kenny & Co Trommel Screen is a rotating drum used to separate materials by size. Material is fed into the Trommel Drum and passes over a series of screens containing specific hole sizes. The fine materials fall through the screen holes, while the over size is discharged out of the end of the drum.

Kenny & Co offer a range of Trommels with a range of screen sizes to suit all waste streams. Within the Trommel Screen range Kenny & Co can offer a wide range of options:

- Steel support structures
- Punched Plate Screens
- Replacement Drums
- Mesh Screens
- Lifters
- Bag Splitter Knives
- Paddles for lifting waste streams

Kenny & Co systems are robust built, long life, large throughput, cost effective systems with low maintenance. All our systems are priced to suit your budget, to date Kenny & Co have over 160 systems across the country.

## SPECIFICATION

### Kenny & Co 615

- \* Drum Diameter 1.8m
- \* Screening length 3.33m

### Kenny & Co 620

- \* Drum Diameter 1.8m
- \* Screening length 4.33m/8m

### Kenny & Co 630

- \* Drum Diameter 1.8m
- \* Screening length 9m

### Kenny & Co 660

- \* Drum Diameter 1.8m
- \* Screening length 12m/18m

### Kenny & Co 830

- \* Drum Diameter 2.4m
- \* Screening length 5m/12m

- \* Drive system 4WD

- \* Sealed drum inlet to prevent waste spillage

- \* Access inspection doors for maintenance

- \* Heavy Duty Chassis

- \* Heavy Duty Bearings

- \* Enclosed Dust Covers

- \* Sound Proof Dust Covers

- \* Tracking drum wheels

- \* Built to health and safety standards BS CE Standards
